ACACIA 项目参与证明

　　中山大学公共卫生学院（深圳）预防医学专业陈俊宏(学号：18314002)于**2019.8至2021.8**作为调查员参与了中国基层卫生保健质量队列项目(ACACIA Study)，全程参加PPPC　　验　工作和全国7省SP　问路线规划。

　　标准化患者是经过训练，能够稳定地扮演患者的症状、体征和情绪特征的假患者。ACACIA项目利用匿名标准化患者(Unannounced Standardized Patients, USP)评估并长期跟踪全国7省基层卫生服务质量、费用和患者体验。

We hereby certify that

Junhong Chen (Student ID: 18314002) majoring in Preventive Medicine, School of Public Health,Sun Yat-sen University participated in the project of Primary Health Care Quality Cohort In China (ACACIA Study) as an investigator from August 2019 to August 2021, contributing specifically to the verification of PPPC questionnaire and the route planning of SP's visit in seven provinces in China. Standardized patients are trained to consistently act out the symptoms, signs and emotions of patients with certain conditions. ACACIA Study uses unannounced standardized patients (USP) to assess and track over time quality, expenditure and patient experiences of primary healthcare in seven provincesin China.
